

FlexScan® S1703-A

17.0" (43.3 cm) LCD Monitor

17-Inch Square Monitor with 5-Year Warranty and Long-Term Supply

Digital and Analog Inputs

With both DVI-D and D-Sub mini 15-pin inputs, you can use a computer that has either a digital or an analog graphics board (or both if connected to two computers), and quickly switch between the inputs via a front panel button.

Automatic Image Adjustment

The Self Adjustment function automatically adjusts the display to suppress flicker and drift. Furthermore, monitor cables produced to minimize noise are bundled with the S1703-A.

Long-Term Supply

The S1703-A is the successor to the S1703. With this stable supply of 17-inch square model monitors it can be adopted with confidence with legacy equipment and systems.

Built to Last Five Years

The S1703-A comes with a 5 year warranty*. Even if the initial purchase price of the FlexScan S1703-A is higher than another 17-inch monitor, the TCO (total cost of ownership) will likely be lower due to the significantly longer buying cycle and less need for repair.

*Up to 30,000 hours of use

FlexScan® S1703-A

Optimized Brightness with Auto EcoView

The Auto EcoView function measures ambient light and optimizes the screen's brightness to minimize eye fatigue caused by bright screens in dark conditions.

The screen brightness automatically decreases in dark rooms.

Reduce Blue Light by 80%

The S1703-A has a display mode called Paper Mode which changes the color of the screen to resemble paper. In addition to using the Auto EcoView function to adjust the screen brightness, documents and electronic books can be viewed resembling physical paper. This significantly cuts blue light, reducing eyestrain.

Flicker Prevention

A modulated light adjustment function prevents flicker at low brightness settings to reduce eye fatigue.

Anti-Glare Treatment

A non-glare screen reduces eye fatigue by dissipating reflective light that otherwise makes the screen difficult to view. Furthermore, the surface of the bezels is treated to prevent light reflection.
