

## Reliable SDI Connectivity with a Clean Workspace

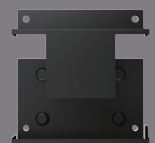

### Reliable SDI Connectivity

The ColorEdge PROMINENCE CG3145 has been tested for compatibility with the AJA Hi5-4K-Plus SDI to HDMI converter so you can reliably equip the monitor for SDI connectivity.

### Maintain a Clean Workspace

The CB-01 SDI converter bracket is designed for attaching the AJA converter to the back of the monitor, providing simple SDI connection and keeping cabling controlled and out of sight. Furthermore, the ColorEdge PROMINENCE CG3145\* powers the Hi5-4K-Plus via the USB power cable that comes with the CB-01. This eliminates the need for the power adapter that comes with the converter.
