PRECAUTIONS

This manual uses the safety symbols below. They represent critical information. Please read them carefully.

WARNING

Failure to abide by the information in a WARNING may result in serious injury and can be life threatening.

CAUTION

Failure to abide by the information in a CAUTION may result in moderate injury and/or property or product damage.

Indicates a prohibited action.

Carrying the monitor

CAUTION

- Remove the sound unit whenever moving the monitor.

Lifting the monitor by the sound unit is dangerous. It may result in injury or equipment damage.

Operation

WARNING

- Keep the power terminal cover for the optional i-Sound™ unit away from children and infants. Children and infants may accidentally swallow the cover and choke. If swallowed, consult a doctor immediately.

CAUTION

- When adjusting the viewing angle of the monitor, do not do so by the sound unit. Adjusting the monitor by the sound unit may dislodge it from the LCD monitor or result in accidental pinching of the skin. Be careful not to drop or tip over the LCD monitor when removing the sound unit from the monitor.

Cleaning

WARNING

- Keep liquids away from the monitor and the sound unit. Spillage into the unit may result in fire, shock, or equipment damage.

CAUTION

- To ensure safety, always unplug the monitor before cleaning the sound unit. Failure to do so may result in electric shock.
- Never use thinner, benzene, or other strong solvents or abrasive cleaners to clean the unit, as these may cause damage to the unit.

Others

- The EIZO *i*Sound™ unit should only be used as a sound unit for the new range of EIZO LCD monitors. It should not be used for any other purposes.
- The EIZO *i*Sound™ unit is for the exclusive use of EIZO LCD monitor which provides the proper electric and physical construction for the unit.
- The sound unit is shielded to prevent creating a magnetic field. However, it is advisable not to place any magnetic items (ex. recorded cassette tapes, watches, cash cards, floppy diskette, etc.) near the unit to avoid any ill-effects to the items.

INTRODUCTION

About This Manual

This manual explains the precautions, features, specifications, and operation of the EIZO i-Sound™ sound unit.

Package Contents

- i-Sound Sound Unit 1
- Stereo Mini-jack Cables 2
- User's Manual 1

NOTE

- If any of the above-listed items is missing or damaged, please contact your local dealer for assistance.
- We recommend that you retain the original packing materials in case of future need.

FEATURES

The EIZO i-Sound sound unit for LCD monitor is specifically designed for the new range of EIZO LCD monitors making them complete multimedia units. This unit has two speakers that produce clear stereo sound, a microphone and a volume control. It also accepts audio input from different audio devices such as a sound board, CD and cassette player, as well as a microphone.

- Easy to fit and provides a sleek professional look
- No need for an AC power cord

The unit is connected through a direct power supply connector (DC IN) from the monitor. When the monitor enters into a power saving mode, the speakers will turn off.

- Microphone
- Bass Reflex Ports
- Output connection and headphones jack

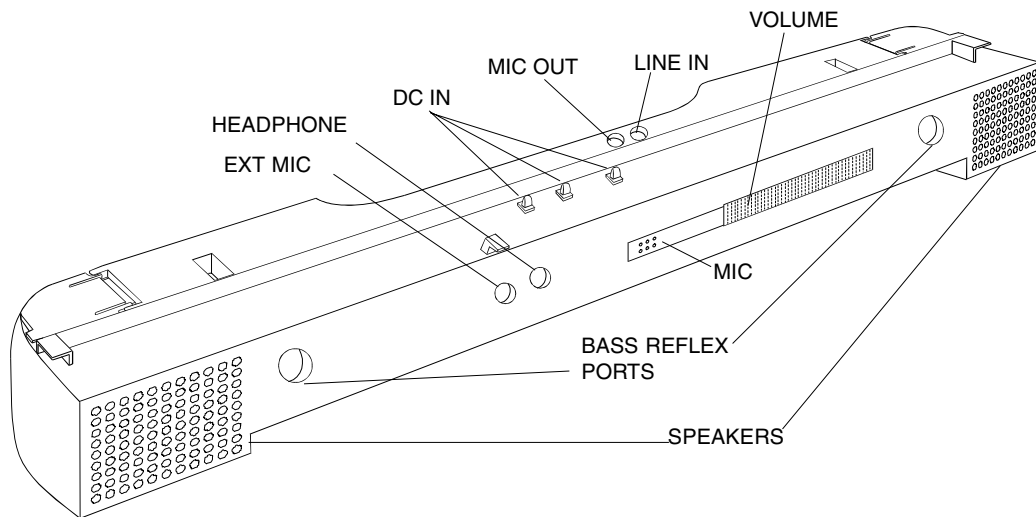

A MIC OUT and headphones jack are installed on the speaker unit. The MIC OUT jack is to be used to transfer sound data from the internal and external speakers to a computer.

- Volume Control

A Volume Control dial is provided to alter the sound level from the speakers or the headphones.

CONTROLS AND CONNECTORS

Front / Top / Side

Front / Top/ Side

- **DC IN:** Power supply from the monitor
After combining the monitor and the speaker unit, the DC IN connector allows for an automatic power supply of the speaker unit through the monitor.
- **MIC:** Internal microphone
The microphone can receive most types of sound (voice, music, etc.). In order to utilise the audio input with a computer, please connect the computer with the MIC OUT.
- **EXT MIC:** External microphone jack
Please use this jack for the external microphone. The sound from the microphone can be output to other devices such as computer when connected to the MIC OUT.
- **HEADPHONE:** Headphones jack
A set of headphones is a great tool to work without disturbing people within a close range. When using the headphones, the speakers will not channel any audio information.
- **VOLUME:** Volume control dial
A volume control dial is provided to alter the sound level from the speakers or the headphones.
- **LINE IN:** External input jack
Please use this connection for external devices such as audio peripherals, computers, sound boards to input sound to be heard through the speakers or headphones.
- **MIC OUT:** Sound output jack
This jack transfers the sound data from the internal and external microphone. The data can be used by a computer through a connection stereo Mini-jack Cable.

1 INSTALLATION

NOTE

- Always switch the monitor off before installing or removing the sound unit and whenever connecting or disconnecting any other devices to the sound unit.

1. Remove the power terminal cover of the LCD monitor.

Switch the monitor off and remove the power terminal cover as shown below. Please keep the covers for use at a later time (ex. when moving the monitor, etc.).

WARNING

- Keep the power terminal cover for the optional i-Sound™ unit away from children and infants. Children and infants may accidentally swallow the cover and choke. If swallowed, consult a doctor immediately.

NOTE

- Do not remove the power terminal cover on the monitor for any other reason than to attach the i-Sound unit. In case the power terminal connectors are short circuited and the monitor is damaged, disconnect your monitor without touching the DC IN connector of the unit and contact your dealer for advice.

2. Connect the cables of the peripherals to the sound unit.**External audio devices and the computer****NOTE**

- Please use the Stereo Mini-jack Cable enclosed (or another cable with the same specifications) for connecting audio devices or computers to the unit.

1. Connect the headphone jack (or a line out jack) of the device (or a computer) to the LINE IN jack of the sound unit using the Stereo Mini-jack Cable.

<L360/L66>

<Other Equivalent LCD Monitors>

2. Attach the sound unit to the LCD monitor. Place the sound unit under the monitor screen and insert the hooks on top of the unit into the holes located under the monitor screen. Then, slide the unit into place by pulling softly from the rear side of the monitor.

a) Slide the unit into place by pulling softly from the rear side of the monitor.

b) Set the supports upright to fix the sound unit to the LCD monitor. Set the hook of the support between the grooves in rear of the LCD monitor.

<L360/L66>

<Other Equivalent LCD Monitors>

3. Fix the Mini-jack cable on the guides on the rear of the monitor as shown at the picture below to keep it from being pinched underneath the monitor. Install the Mini-jack cable through the stand and replace the rear cover back.

<L360/L66 Desktop Stand Type>

<Other Equivalent LCD Monitors>

Speakers and sound control

1. Besides the speakers on its unit, audio performance is available by connecting the audio devices from the speaker or the headphones to the i-Sound™ unit (When headphones are connected, no sound can be heard from the speakers.)

2. Please use the volume control to adjust to the desired sound level.

Microphones

For internal microphone:

1. Switch the monitor off and the computer, then connect the MIC OUT jack of the unit with the LINE IN jack of the computer using the Stereo Mini-jack Cable.

<L360/L66>

<Other Equivalent LCD Monitors>

2. Attach the sound unit to the LCD monitor (See page 11).

3. Fix the Mini-jack cable on the guides on the rear of the monitor as shown at the picture below to avoid being pinched underneath the monitor. Install the Mini-jack cable through the stand and replace the rear cover back. See the picture below.

<L360/L66 Desktop Stand Type>

<Other Equivalent LCD Monitors>

For external microphone:

If using an external microphone, connect it to the EXT MIC jack of the unit. When connecting the external microphone, the internal microphone does not input any sound.

<Example>

NOTE

- Power Macintosh computers are customized and work specifically with their exclusive PlainTalk microphone. This being the case, neither the internal microphone nor an external microphone connected to the i-Sound unit will work.
- The speakers (or the headphones) do not generate sound from the internal microphone (MIC) or the external microphone (EXT MIC).

2 TROUBLESHOOTING

This page presents problems that can be corrected by the user. If a problem persists even after applying the suggested remedies, contact an EIZO dealer.

Problems	Points to check with possible solutions
• No sound	<ul style="list-style-type: none"><input type="checkbox"/> Check that the monitor is turned ON.<input type="checkbox"/> Check that the power terminal covers on the monitor are removed.<input type="checkbox"/> Check that the sound unit is correctly connected to the monitor.<input type="checkbox"/> Check that the PowerManager function of the monitor is not in effect.<input type="checkbox"/> Check that the audio devices are correctly connected to the sound unit.<input type="checkbox"/> Check that the connected audio devices are turned ON.<input type="checkbox"/> Check that the volume is set at an audible level.<input type="checkbox"/> If you connect a set of headphones, please remember that no sound will come out from the speakers. Check that the headphones are correctly connected to the appropriate jack for a good sound quality.

3 CLEANING

WARNING

- Keep liquids away from the monitor and the sound unit. Spillage into the unit may result in fire, shock, or equipment damage.

CAUTION

- To ensure safety, always unplug the monitor before cleaning the sound unit. Failure to do so may result in electric shock.
- Never use thinner, benzene, or other strong solvents or abrasive cleaners to clean the unit, as these may cause damage to the unit.

- Periodic cleaning is recommended to keep the sound unit looking new and to prolong its operational lifetime.
- To remove stains, wipe the unit with a soft, lightly moistened cloth using a mild detergent. Do not spray wax or cleaner directly onto the case.
